Hi Grant,

We have a team in ORCR that will support this Grant rather than a single person. Some of this is CCR work and the other Recycling so different skillsets and different offices in fact. Jessica Young will be the contact to send the work through and of course Ruby and I remain available. Happy to discuss further. I am at 202-525-0202 and can chat this afternoon from the car.

Good Afternoon Carlton and Ruby –

Ruby, I know that Carlton is traveling and wanted to ask if there's someone who I can follow up with for working on the report? Completely understand that everyone is busy and very much appreciated any time that OLEM can spare to assist on this effort.

Best,

Grant

Good Morning Carlton,

That's great, thank you very much.

For crypto, power use is definitely the main issue, so OAR will tackle the air emissions, climate and other air-related issues.

Best,

Grant

**Subject:** Re: Crypto and Environment Rpt

Wow, Grant, that reads as though Crypto is custom made for OLEM. We certainly have that expertise! If we treat crypto like all of the regular sources of this waste we are solidly in our lane. If you are any someone with “power plant expertise” or knowledge of the relationship between crypto and power plants or “crypto waste streams” our work does not flow along those lines but we are happy to share what we know and lean into the joint effort.

Hi Carlton,

Thank you for the follow-up message.

## **Ex. 5 Deliberative Process (DP)**

I hope this helps and can also connect with staff if that would assist.

Thanks,

Grant

We will provide some names, but this is not part of our wheelhouse so we do not have people who will have power plant or crypto expertise in their OLEM work.

Hi All,

I wanted to send an update on the crypto and environment report, ask for a key input and also express my thanks.

First, thank you. We had an internal organizational meeting where we walked through timeline for production, the report outline and some additional issues. I truly want to thank you and your staff for the significant participation at the meeting.

Currently, we're at the point where we need to give OSTP comments on the outline and then begin to work with OSTP and other federal agencies on the report's production.

I have broken down the general tasks for report production (below).

For the input, could I please get the names of the individuals from each program office that are cleared to work on these tasks? When I asked staff on the call who would be included, several staff said that they would have to check with their supervisors, which I completely understand. If this message can be forwarded to whoever is designated to approve the work, that would be great.

Also, if I can be helpful answering any questions or providing additional information, please just say the word.

Thanks very much,

Grant
